ABOUT ME.

Web designer with 10+ years of experience. My designer days started in the late 90s, with web design school in HTML. Later, I started learning graphic design using modern tools, which led me to further advancement, and CMS with WP and Joomla. In 2011 I took a course in Design & Multimedia to learn about Print design, and to get my Adobe package knowledge to a bit higher level, learning Vector graphics. Racing with technology, during 2017 I have finished a Java Programmer course, and got interested in Android Development, which took me to learning Android Programming in 2018.
